PROFESSIONAL SUMMARY

Detail-oriented BSc Computer Science student who has built three Flutter mobile apps using Dart, Firebase, Cloud Firestore and Hive, and who handles daily operations and system troubleshooting at a logistics hub. Experienced with REST API integration, a Python FastAPI backend, and Git and GitHub. Reliable and proactive at resolving issues under time pressure. Seeking a Junior Flutter Developer, entry-level software development or IT support role.

TECHNICAL SKILLS

- **Mobile Development:** Flutter, Dart, Android
- **Backend and Data:** Firebase, Cloud Firestore, Hive, REST API integration, FastAPI
- **Programming Languages:** Dart, Python, JavaScript
- **Web Technologies:** HTML5, CSS3, React
- **IT Support:** Hardware Support, System Troubleshooting, System Support
- **Tools:** Git, GitHub, VS Code, Android Studio

WORK EXPERIENCE

Hub Assistant - Ekart Logistics

Feroke, Kerala, India | Aug 2025 - Present

- Manage daily cash handling and maintain accurate transaction records.
- Diagnose and resolve system and operational issues, minimizing downtime and disruption to hub workflow.
- Support the logistics team by proactively identifying and addressing operational challenges.

PROJECTS

FreshTrack - Smart Food Inventory App

Tech: Flutter, Dart, Firebase, Cloud Firestore

- Built a mobile app that tracks household food inventory and expiry dates and sends expiry alerts to reduce food waste.
- Stored inventory data in Cloud Firestore through Firebase.

Expense Tracker - Personal Finance App

Tech: Flutter, Dart, Hive

- Built a personal finance app that manages multiple accounts with income, expenses and transfers.
- Implemented account balances, transaction history and spending analytics, with data stored locally in Hive.

CodeStep - Coding Learning App

Tech: Flutter, Dart, Python, FastAPI, HTML

- Built a learning app with topic-based Python and HTML lessons and coding exercises.
- Connected the Flutter client to a Python FastAPI backend through REST APIs.
